Kyle Caldwell  
Neighbor In Need, Inc.

Dear Kyle,

Even though I am writing this addressed to you, as President of Neighbor In Need, please know that it is meant for every person responsible for, and/or involved in any way with the project on my house.

I've sprained my brain trying to find the words to fully express my profound gratitude for all the blessings my family and I have received from the generosity of the "Good Souls" of Neighbor In Need.

The new roof, clean, beautiful, leakless, is a dream come true, despite the fact that I've had a couple of squirrels give me a, "What did you do that for?" look. I'm sure that in time they'll survive the shock and forgive all.

It's impossible to describe the pleasure experienced from sewer pipes that work, and the service rendered by the new copper pipes throughout the house---to say nothing of never having to buy bottled water ever again, something we've had to do for over 15 years. It's amazing!

And, following the priceless advice I've been given, I plan to pursue the advantages of a Reverse Mortgage as I feel confident this will insure and/or secure a financial recourse for any future repairs, emergencies, or improvements when they occur.

Having these desperately needed repairs made is unbelievably gratifying and I will be forever grateful. But, the pleasures I treasure the most, that have affected me the most, are the genuine love, kindness, caring, and respect I have received from those with whom I had direct contact, not only the planners and architects of this renovation project, but, the graciousness, delightfulness, and respect from all those good people who did the work. Not only have my worldly needs been met, but, I have experienced first hand Mans Humanity To Man, and it is good! My cup truly runneth over.

With sincere and enduring gratitude to all,

Respectfully,

*Nell* [REDACTED]
